KONA'S BIG CROPS AND COURT TERM

What Happened to the Criminal
Calendar and Why—Sugar
and Sisal.

KONA, May 7.—During the past two weeks Kona has been enjoying the usual spasm of excitement incident to the meeting of the jury term of court. The only item of special interest incident to the term was a "roasting" which the grand jury gave to County Attorney Williams for his inefficiency and lack of attention to the duties of his office. It is a poor month when somebody does not take a slam at Williams. But then the people of this county appear to like that kind of an Attorney, or they would not elect him, so those of us who think differently can only swear under our breath and hope that at sometime in the dim and misty future we may be permitted to have a County Attorney who understands his business.

The Jap gambler who killed a companion in Kau a few weeks ago was permitted to plead guilty to manslaughter, and received a sentence of ten years. The evidence against him was chiefly his own confession.

WILLIAM'S WAY OF DOING.

The balance of the criminal calendar went pretty well to pieces, chiefly owing to the inefficient preparation of the evidence on behalf of the prosecution. A particularly rank case was that of the Deputy Sheriff of South Kona who was charged with embezzlement. His case came before the grand jury at Kau last year; but, at the request of District Attorney Williams, was postponed to the present term, he agreeing to present it then. An essential part of the evidence was to prove by certificate of the County Clerk that the Deputy Sheriff had been elected as such. Williams came from Hilo without this evidence, although he knew it would be required, so that when the case came on for trial there was nothing to be done but not pros. In another case an essential witness was in Kau, and, although a subpoena was issued, no effort was made to secure the witness, and this case went the same road.

HOLUALOA SCHOOL LOT AGAIN.

The old squabble over the ownership of the government school house lot and the residence of M. F. Scott at Holualoa, again came up in the shape of a civil case to quiet title. This is the case in which some of our distinguished fellow-citizens were indicted for riot and convicted on the evidence of Mrs. Mary Atcherley who saved herself from the legal dragnet by turning state's evidence. The case resulted in the claim of the Board of Education and Mr. Scott to the possession of the land being sustained.

M'WAYNE SISAL PLANTATION.

The McWayne sisal plantation has been developing very quietly for the last four years, and has just begun harvesting its first crop of fiber with a well-constructed plant similar to the one at Ewa, Oahu. The first shipment of fiber has gone forward to the Coast, with every appearance of being as fine an article as that produced at Ewa, which means that it is equal to anything in the world. The company expects to transport the leaves to the mill by overhead trolley, the posts and cable being on the ground, but it is not yet in working order. The transportation is now being done by wagons. The water to operate the mill is secured from a surface well at Kallua, being pumped a distance of some 1800 feet to the mill. The progressive character of some of the Kona "old-timers" is evidenced by the fact that the sisal mill is located within 300 feet of where water is obtainable, the intervening land being chiefly a rocky waste, but the owner refused to allow a two-inch pipe to be laid across the lot, necessitating the mill company laying 1800 feet of pipe to get around the intervening land. The company has approximately 1000 acres of growing sisal in an extremely healthy and flourishing condition and has good reason to expect a prosperous future.

PINEAPPLE PROSPECTS.

The superiority of Kona over some other localities, for growing pineapples, is shown by the fact that the Bruner cannery in South Kona is already in operation for the crop of 1908, while the canneries on Oahu will not be under way until toward the end of June. Mr. Forbes, late manager of Kukui-hale, visited the district last week and devoted special attention to examining

EIGHT TENTACLE POWER.

The Octopus—I can make myself into a pretty fair auto, when I set my mind to it.

the pineapple fields in South Kona. It is rumored that he is thinking of going into the pineapple business himself. There is plenty of good pineapple land in Kona and the district would welcome a man of Mr. Forbes' well known energy and ability.

Under the management of E. E. Conant, the Kona Agricultural Company has planted nearly fifty acres in pines during the past few months. With the large area controlled by this company, it will soon be an important factor in the pineapple business of Hawaii.

MISS BEARD'S ORPHANAGE.

We hear that Miss Beard has offered her land and buildings, recently used as the Kona Orphanage, to the government, as a Boys' Home for the use of the boys from Molokai. The price named by Miss Beard is understood to be \$14,000. The property is a bargain at that price. There are nine or ten buildings in good condition besides sheds, stables and outhouses and a number of water tanks ample for the use of the institution. In addition there is a good area of rich land, most of which is cleared and available for cultivation of all the varieties of fruit and vegetables which grow so well in Kona. The bulk of the food used by the home could be raised on the premises. It is the feeling here that the boys would be infinitely better off in Kona than they will be cooped up on the hot coral flat at Kalihi, where, we are informed, the Board of Health contemplates locating them.

SUGAR IN KONA.

The Kallua Development Company is about concluding the harvesting of its crop for the year 1908. What the tonnage will be has not yet been given out; but it is understood to be satisfactory to the owners. The growing cane for next year's crop is in very fine condition, while a large area is being planted for the 1910 crop, more particularly at the Kainaliu end of the district. Chong, who was for so many years a large planter at Pahala plantation is now planting on an extensive scale at Kainaliu, for the Kona mill.

PAPAYAS, PEARS AND MANGOES.

The crop of mangoes is the largest ever seen in Kona, and is accompanied by little or no blight. It will rot by the ton, although the Kona mango is a particularly fine article, for the local population cannot consume one per cent of the crop and as to shipping it to Honolulu—well, we have troubles enough already without trying to invent any new ones. As to papayas, they are half a cent apiece for your pick—and alligator pears are a cent each. In Honolulu the same kind of papayas sell for ten cents each and pears are two or three for a quarter. Why don't we ship them to Honolulu? Well, come up here some of you who would like to speculate, and we will sell you plenty of fruit cheap for cash.

KONA.

CANDY FOR THE BATTLESHIPS.

Fifteen thousand pounds of high-grade bonbons were shipped to the supply ship, the Culgoa, of Admiral Evan's fleet early in the great voyage to Madgalena bay. But this amount of candy was not regarded by naval men as at all excessive. In the separate canteens of the battleships there was probably a much greater

quantity of bonbons. The Culgoa's 15,000 pounds was an extra lot taken as a precaution against exhausted stocks of a necessity of life in the various ships. The attitude toward candy has changed of late years. It is no longer thought childish of effeminate to eat bonbons.

The medical crops of both services recommend sweets to the men, and the commissary makes it easy for them to get the best. Pure candy, and especially chocolate bonbons of high grade, are said to lessen the appetite for strong drink and form one of the best and most nutritious energy-producing foods known.

They are especially recommended

for consumptives in hot countries. When the army of occupation in the Philippines was larger than it now is, shipments three times as large as the one to the Culgoa were made to Manila.

Nell—A girl shouldn't marry a man till she knows all about him. Belle—Good gracious! If she knew all about him she wouldn't want to marry him.—Philadelphia Record.

Visitor—And how is Pat this morning? Mrs. Patrick O'Grady—Sure, yer honor, it's still alive he is. Visitor—Did you give him the soup I sent? Mrs. Patrick O'Grady—Well, no, sir. Father Phelan said it would only be after delayin' him.—London Sketch.

Automobile Hacks

RING UP 361 for the only Automobile hacks in the city.

FRANK LILLIS and his three four-cylinder Franklins are always ready at the Territorial Messenger Service, Union and Hotel.

THE

FORD

A QUALITY CAR

Model "S" 4-Cylinder, 18 H. P. Roadster, \$750.

In every Ford car made, there is used the best material that can be purchased—the cars are designed by Henry Ford, who is acknowledged to be the greatest automobile engineer in the world, and are manufactured in a factory having the finest equipment possible to secure for turning out fine work.

Without considering price, no car is better built than the Ford, nor will prove longer lived, more dependable, or as cheap to run.

That the price is lower is the result of quantity production and sale—manufactured at the minimum cost on account of the enormous number—sold with a minimum profit per car because of the vast number of sales.

You really get a \$15,000 car for half the price, if the other fellow's price is considered.

A four-cylinder 15 H. P. Runabout for \$600; another for \$700; a Roadster for \$750; a Touring car or Roadster for \$2800, gives a car for every pocket-book, each the value of any car at double its price.
